DETAILED ACTION

Election/Restrictions

1. This application is in condition for allowance except for the presence of claims 2-18 to an invention non-elected with traverse in Paper No. 5. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

2. Applicant's election with traverse of Group I, claims 1 and 19-32 in Paper No. 5 is acknowledged. The traversal is on the ground(s) that "A search performed addressing the elected claims would inevitably include a substantial portion of the material addressed in the non-elected claims." This is not found persuasive because non-elected Group II claims are distinctively drawn to paddle latch for a vehicle door(Rachocki, 4,911,487; Applicant submitted), classified in class 292. The inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variant and require search in different classifications. Such additional search places a burden on the examiner by the Applicants.

The requirement is still deemed proper and is therefore made FINAL.

Allowable Subject Matter

3. Claims 1 and 19-32 are allowed.

Art Unit: 2832

Claim 1 recites a locking member interfering the movement of the pawl to maintain the pawl in the latch position when the locking member is in locked position. The ratcheting pawl latch provides the ability to lock and unlock the latch with remote and key operated mechanism. The claimed pawl, in combination with claim 1, is neither disclosed nor suggested by the prior art of record.
